SHIPPING: Standard shipping is UPS Ground. Contact your sales rep for expedited shipping options.

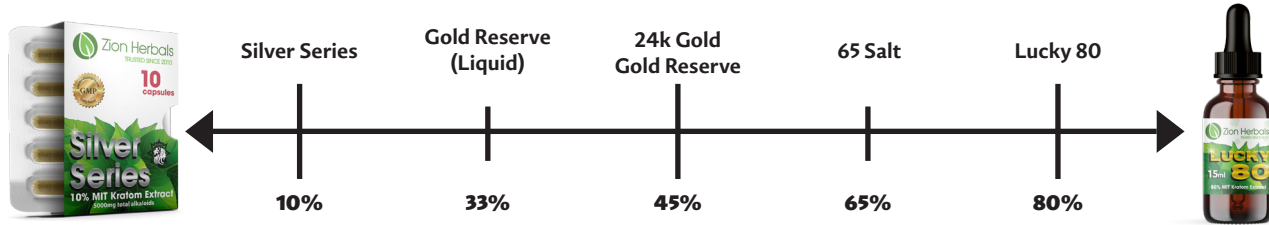

RETURNS: 100% satisfaction or money back guaranteed. Returns can be swapped for other products equal in value or cash back.

UNDERSTANDING MIT IN TERMS OF PURITY PERCENTAGES

Zion Herbal's Mitragynine (MIT) Kratom extract products have a concentrated percentage of the Mitragynine alkaloid compared to Kratom leaf powder. Our **Silver Series** products have a 10% MIT content along with a number of sub-alkaloids in lesser quantities. This is considered a full-spectrum product.

In the **Lucky 80** product line, the MIT content is 80%, while the other sub-alkaloids are found in trace amounts. Generally, the higher the MIT percentage, the more energizing the product.

Zion Herbals MIT Extract products with a lower MIT content retain more of the other alkaloids and lipids found in the Kratom leaf and may offer a more balanced experience.

PICKING A DELIVERY METHOD

When choosing which delivery method to utilize, it is important to understand the benefits to each category.

Liquids have the highest **bioavailability**, refers to the proportion of a substance introduced into the body that is able to have an active effect.

Even though Kratom as a liquid extract has the highest bioavailability, tablets, capsules, and soft gels are a great alternative for ease of use on-the-go. Our tablets have specifically been formulated to be chewable for a quicker release, and are a customer favorite.

Silver Series has highest amount of total alkaloids, offering a full and robust Kratom experience.
